

# SUBSTITUTE SPECIFICATION

[Electronic Version 1.2.8]

[GOLF CLUBS AND A METHOD FOR USING  
THESE GOLF CLUBS FOR GOLF SHOTS UP TO  
100 YARDS FROM THE GREEN]

## Detailed Description

[0001] INVENTORS: LARRY W. COLLUM of HAZLETON, PA and CHARLES LAZUN  
of WESCOSVILLE, PA

[0002] This Non-Provisional Patent Application seeks to obtain priority based  
upon Provisional Patent Application 60/407,415 dated August 28, 2002.

[0003] Background of the Invention

1. Field of the Invention. The present invention relates generally to golf clubs and  
a method for using these golf clubs to propel a golf ball onto the "green" from  
distances up to 100 yards. More specifically, the invention is a series of unique  
golf clubs with wooden golf club heads displaying greater than normal and  
varying loft angles, greater than normal lie angles, shorter club shaft lengths,  
and a new method for using these unique golf clubs for performing "chip shots"
